

DINAKAR Y

953555301 | dinakaryaramati95355@gmail.com | Bengaluru, Karnataka

Professional Summary

Results-driven Software Engineer with 3+ years of experience developing scalable enterprise and FinTech applications using Python, Django, React.js, Next.js, and RESTful APIs. Experienced in building secure, high-performance backend systems and delivering production-grade software solutions in Agile enterprise environments.

- Experienced in designing secure backend systems, authentication and authorization frameworks, payment processing workflows, and real-time notification platforms.
- Proficient in full Software Development Life Cycle (SDLC), Agile delivery methodologies, CI/CD pipelines, cloud deployment, and database optimization using PostgreSQL and CockroachDB.
- Strong expertise in designing resilient, scalable, and high-performance applications with focus on operational stability, performance optimization, and seamless frontend-backend integration.
- Skilled in API development, debugging, production support, cloud deployment, and delivering enterprise-grade software solutions aligned with engineering best practices.
- Adept at collaborating with cross-functional teams, QA teams, and business stakeholders to deliver scalable and business-critical applications in fast-paced environments.

Technical Skills

- Frontend: Next.js, React Native, Tailwind CSS, TypeScript
- Backend: Python, Django, Django REST Framework (DRF), RESTful APIs, Node.js
- Database: PostgreSQL, CockroachDB, Firebase, SQL
- Tools & Platforms: Git, GitHub, Docker, Postman, JWT Authentication
- Cloud & DevOps: Google Cloud Platform (GCP), Firebase Hosting, CI/CD Pipelines
- Core Competencies: API Development, Payment Gateway Integration, Authentication & Authorization, Real-Time Notification Systems, Agile Methodologies, SDLC, Debugging & Performance Optimization

Professional Experience

GTPL – Software Engineer

April 2023 – Present | Bengaluru, India

Key Responsibilities

- Developed and enhanced scalable enterprise-grade web and mobile applications using Python, Django, React Native, Next.js, and RESTful APIs.
- Engineered secure backend systems implementing JWT-based authentication, role-based access control (RBAC), and API authorization mechanisms to strengthen application security and system reliability.
- Designed and developed high-performance REST APIs supporting payment processing workflows, transaction management, notification services, and real-time application features.

- Participated across the complete Software Development Life Cycle (SDLC) including requirement analysis, architecture design, development, testing, deployment, debugging, and production support.
- Collaborated with developers, QA teams, and business stakeholders within Agile/Scrum environments to deliver scalable and production-ready software solutions.
- Designed and optimized PostgreSQL and CockroachDB database schemas, improving query efficiency and supporting high-volume transactional workloads.
- Integrated third-party APIs, payment gateways, authentication providers, and notification services into enterprise applications.
- Implemented automated notification workflows and real-time update systems using Django, Firebase, and API-driven integrations to improve operational efficiency.
- Developed responsive and user-centric frontend interfaces using React Native, Next.js, Tailwind CSS, and TypeScript.
- Contributed to CI/CD activities, deployment processes, debugging, and application monitoring while ensuring adherence to coding standards and engineering best practices.
- Supported production environments by troubleshooting issues, optimizing application performance, and contributing to scalable architecture discussions.
- Utilized Git and GitHub for version control, branch management, peer code reviews, and collaborative development workflows.

Solutions Delivered

1. **FinTech Payment Platform** - Developed a scalable FinTech payment platform supporting secure transaction processing, payment gateway integration, and authentication workflows. Built backend APIs and real-time transaction handling systems using Django and PostgreSQL to ensure reliable and efficient payment operations.
2. **Notification & Management System** - Developed scalable notification management modules with real-time updates, read/unread tracking, and centralized dashboard functionalities. Implemented JWT authentication, RESTful APIs, PostgreSQL integration, and frontend dashboards using Django and Next.js.
3. **Wellness Booking Application** - Developed a cross-platform mobile application for therapy booking and automated appointment scheduling using React Native and Firebase. Integrated Firebase real-time synchronization features and enhanced mobile user experience through responsive and optimized UI implementation.

Education

- Basaveshwar Engineering College, Bagalakot – BE (ECE), 2022 | CGPA: 6.58
- Vasavi Comp PU College, Bellary – PUC (PCMB), 2018 | 63%
- Vidhya Eng Med High School, Sindhanur – SSLC, 2016 | 80.48%
